Release PV610 SV201

The theme of this release is v8 compatibility.

Prerequisites

- This solution is compatible with OneStream Platform v8.
- This release supports an over-install for previous releases. Any modifications to business rules or connectors must be redone. Reach out to your OneStream Software representative for questions regarding the over-install process.
- See the *Standard Application Reports Setup Instructions* for deployment details and how to manually remove previous releases of the Standard Application Reports (RPTA) solution.

Release PV610 SV200

Prerequisites

This release supports an over-install for previous releases. Any modifications to business rules or connectors must be redone. Reach out to your OneStream Software representative for questions regarding the over-install process.

See the *Standard Application Reports Setup Instructions* for deployment details and how to manually remove previous releases of the Standard Application Reports (RPTA) solution

New

None

Changed

- Add Row Count to the following Reports:
    - Member Changes Detail Audit Report (MP3-2250)
    - Member Changes Audit Report (MP3-2251)
    - Member Property Changes Audit Report (MP3-2252)
    - Member Formula Changes Audit Report (MP3-2253)
- Add additional field to the Metadata Application reports showing changed "from" and changed "to" values (MP3-1667)

Fixed

- Metadata Analysis' Orphaned Members report shows the missing Dimension Type in the report sub-headers. (MP3-720)

- The Entity Data Statistic report no longer produces an error when missing parent relationships. This report will run bypassing entities with no associated relationships to display remaining results. (MP3-717)
- Data Validation's Intersection Errors report includes the full description in 'Intersection Error' column. (MP3-230)
- The Data Unit Comparison report displays a blank report if the selected Cube and Enitity have no associated relationship. (MP3-700)
- Workflow Profile Audit group reports display blank reports instead of an error message when the "Default" scenario is altered in the "Profile Active" property of the XML. (MP3-2326)
- If a dimension is renamed or deleted, the dimension combo box selection on the Metadata Change Audit Reports will no longer show the renamed or deleted dimension in the dropdown list. (MP3-1863)
- Regressive Issue with Dropdown when Multiple Import Steps Exist in Workflow (MP3-613)
- Formula Type property values set to "(Not Used)" display as "(Not Used)" instead of "Unknown" when using the Metadata Change Audit report group. (MP3-722)
- Workflow Audit report returns Old Value and New Value data instead of "(Unavailable Value)" when the group exists. (MP3-1913)
- The Workflow Profile Audit report total records matches the number of rows. (MP3-2101)
- The Finnish Culture Code (FI-fi) accepts the date format DD.MM.YYY when running application reports. (MP3-681)
- Report Designer modifications for the Dashboard Maintenance - Updated report are applied and the change events show a username and time stamp. (MP3-2154)
- Application Reports' Import Detail reports lists all available workflows in the Workflow Profile dropdown. (MP3-1803)
- Data Validation's Unmapped By Dimension report lists all available worklflows in the Workflow Profile dropdown. (MP3-1910)

- All available workflows appear in the Workflow Profile dropdown for the following report groups (MP3-613; MP3-1803; MP3-1910):
    - Data Validation
    - Import Detail
    - Import Detail (All Dims)
    - Import Detail (Source ID)
    - Import Var (WF vs Preserved)
    - Import Var (Prompt)
- Data Validation's All Stage Source and Target Data shows all lines, including duplicates, from the data load process. (MP3-1998)
- Metadata Change Audit's Member Formula Changes Audit report reflects deleted or NULL formulas. (MP3-1834)
- Data Validation's Unmapped By Dimension report shows data or a blank report when selecting "Flow" from the Dimension filter. (MP3-699)
- Metadata Analysis' Parent Count For Members report navigation via the document map is available. (MP3-721)
- The Dashboard Maintenance - Update report shows the updated Dashboard Maintenance Unit names. (MP3-2571)
- Import Detail (Source to Target) Report shows all records if the Amount and Account are the same but the Cost Center is different. (MP3-175)

Known Issues

None
